Work Experience

Full Stack Engineer

Deloitte – May 2019 to Present

- Crafted a UI dashboard in VueJS to help analysts efficiently track supply chain anomalies
- Architected style and design patterns for a detailed supplier tracking app from the ground up
- Illustrated supplier data points from JSON with charts and graphs using D3 and Canvas

Full Stack Developer

Barquin Solutions – May 2018 to April 2019

- Troubleshooted feature and maintenance requests on older code base built in Rails and React
- Ensured maintainability of codebase using React Testing Library (Jest)
- Created detailed graphs of foreign aid data with D3 and SVGs to help inform policy decisions
- Improved 508 compliance and mobile responsiveness to provide a good experience for all users

Front End Developer

Solutions By Design II, LLC – January 2018 to May 2018

- Created Medicare/Medicaid enrollment dashboard with ReactJS to match design specifications
- Integrated JavaScript (Jest) and ReactJS (Enzyme) testing for compliance with Jenkins pipeline
- Utilized Webpack, Sass, and Docker to simplify work flow in consistent team build environments

Senior Web Developer

RIVA Solutions, Inc – October 2016 to January 2018

- Refined global resource library of Consular training tools via jQuery and DOM manipulation
- Simplified code bloat by over 50% with custom WordPress theme to modernize government site
- Picked and implemented new technologies to increase site stability for the future

Full Stack Rails Cohort (Bootcamp)

DevPoint Labs – May 2016 to July 2016

- Developed web applications using Ruby on Rails and ReactJS on the frontend
- Built interactive components with JavaScript, jQuery, and state management with Redux
- Conducted automated testing of Rails applications with RSpec and Selenium

WordPress Developer/Integrator

OBXtek – September 2015 to May 2016

- Implemented UX designer's recommendations into live WordPress multisite installation
- Built local sandbox with Vagrant, Composer, and GitHub to test changes before implementation
- Collaborated on an agile team, utilizing JIRA, Git branching, and version tagging

Junior Web Developer

Boostability – November 2012 to April 2015

- Developed over 30 responsive websites to design specifications in WordPress from scratch
- Built eCommerce sites and cleaned up CSV product sheets for mass import
- Identified priorities to finish maintenance requests and web builds within set deadlines

Education

Bachelor of Science in Communication, emphasis in Computer Information Science

Brigham Young University - Idaho – August 2008 to July 2012

Full Stack Rails Cohort

DevPoint Labs – May 2016 to July 2016
